

2023

TWIN VALLEYS PUBLIC POWER DISTRICT

AIR SOURCE HEAT PUMP

SEER RATINGS

15-15.9 SEER, 12.5 EER, 8.5 HSPF (2023 only)
Electric backup **\$700**
Propane or Natural Gas backup **\$500**

16-16.9 SEER, 12.5 EER, 8.5 HSPF
Electric backup **\$700**
Propane or Natural Gas backup **\$500**

17-18.9 SEER, 12.5 EER, 8.5 HSPF
Electric backup **\$1200**
Propane or Natural Gas backup **\$1000**

19+ SEER, 12.5 EER, 8.5 HSPF
Electric backup **\$1700**
Propane or Natural Gas backup **\$1500**

Variable Capacity

(inverter driven)

Electric backup **\$1700**
Propane or Natural Gas backup **\$1500**

AIR SOURCE HEAT PUMP

SEER2 RATINGS

Not Available after 2023

15.2-16 SEER2, 11.9 EER2, 7.5 HSPF2
Electric backup **\$700**
Propane or Natural Gas backup **\$500**

16.1-18 SEER2, 11.9 EER2, 7.5 HSPF2
Electric backup **\$1200**
Propane or Natural Gas backup **\$1000**

18.1+ SEER2, 11.9 EER2, 7.5 HSPF2
Electric backup **\$1700**
Propane or Natural Gas backup **\$1500**

Variable Capacity

(inverter driven)

Electric backup **\$1700**
Propane or Natural Gas backup **\$1500**

Ductless Mini-split

16+SEER, 12.5 EER, 8.5 HSPF

16+SEER2, 12.5 EER2, 7.7 HSPF2

\$700 - Electric Backup
\$500 - Propane or NG Backup

Variable Capacity

\$1000 - Electric Backup
\$800 - Propane or NG Backup

Variable Capacity

Multi heads, 3 ton or greater

\$1700 - Electric Backup
\$1500 - Propane or NG Backup

Variable Capacity must be inverter driven - Provide documentation that shows manufacturer, model number and that states the equipment is "inverter driven"

G E O T H E R M A L H E A T P U M P

Any EER \$3700

Variable Capacity 35+ EER \$4600

E X T R A S

Resistance Heat \$200

Water Heater \$250

Desuperheater \$150

Residential Rebates

Guidelines

- Incentives apply for new construction, conversion from fossil fuel to electric or air conditioning to a heat pump, and upgrades of existing heat pumps to new pumps.
 - All air source heat pumps must be at least a 15 SEER, 12.5 EER, and 8.5 HSPF or higher SEER efficiency rating, and 15.2 SEER2, 11.9 EER2, and 7.5 HSPF2 or higher SEER2 efficiency rating.
 - An AHRI or EnergyStar certificate is required for all heat pumps. If a certificate is not attached to the verification form the maximum incentive will be \$100.
 - All space heating and water heating equipment must be permanently installed and operating in a residential single-family dwelling.
 - Mobile homes that meet the criteria for residential classification are designed for year-round living, set on a permanent foundation, skirted, permanent utilities are installed and the towing provisions and running gear are removed.
 - A cabin must be heated during the winter months of October to May.
 - Duplexes or Condominiums must be separately metered to be eligible.
 - The installing dealer must complete startup testing, review potential issues with the customer and complete the Mini-Split, Air Source, and Geothermal Heat Pump Application.
 - All incentives will be paid when the application form or receipt is received by Twin Valleys Public Power District.
 - When two or more qualified heat pumps are installed in the same house, both or all are eligible for the full rebate amount.
 - Package Terminal Heat Pumps (PTHPs) are not eligible. Only split system heat pumps with a ducted supply and return system and the ductless mini-splits are eligible.
 - Installation of the water heater must be new or a conversion from a fossil fuel and in connection with electric heating. The home needs to qualify for the Twin Valleys Public Power District's all-electric rate.
 - A copy of the paid invoice must accompany the rebate request.
 - The desuperheater rebate and the resistance water heater rebate can both be received by the homeowner if both are installed.
-
